Recent Projects

Moonlighter | Software Engineer | github.com/HacklightMoon/moonlighter 2016

Gamification of open-source issues encouraging community amongst developers via code challenges and contributions towards user projects. Level-up your character, gain XP, and earn coins for solving Github issues.

- Technology: AngularJS | Node.js | Express.js | PostgreSQL | Jade | SASS | Bootstrap
- Architected the front-end, creating multi-view states, controllers, custom directives, and services.
- Utilized the CodeWars API to incorporate coding challenges.
- Designed, animated, and structured the interface for optimal UX and UI as the driving motivation.

YumSnap | Software Engineer & Scrum Master | github.com/weeknightdangerous/chppr 2016

Social Media app reviewing user-submitted dishes from restaurants.

- Technology: React | Material.ui | Node.js | Express.js | PostgreSQL | Multer | SuperAgent
- Implemented form verification to decrease risk of user error and increase overall experience.
- Collaborated in drag-and-drop feature for user photographs using Multer and SuperAgent.

TrailPark | Software Engineer | github.com/weeknightdangerous/weeknightdangerous 2016

Trail-finding app for hikers utilizing geolocation and photos pooled from social media.

- Technology: AngularJS | Node.js | Express.js | PostgreSQL | Jade | SASS | Bootstrap
- Co-architected the front-end, creating views for single trail profiles as well as trail lists for entire regions.
- Pulled data from multiple APIs to showcase information providing a content-rich user experience.
- Created the layout and design of the app using AngularJS, Jade, and SASS.

Professional Experience

MakerSquare | New York, NY - *Technical Fellow* 2016-2016

- Acted as an educational resource and point of support for MakerSquare students.
- Built extra curriculum on specific topics while providing after hours talks on said topics
- Conducted technical admission interviews for potential future students.
- Worked one-on-one with students to develop their understanding of full stack development

Beaver Street Brewery | Flagstaff, AZ - *Bar Manager* 2015-2016

- Hired, trained, and scheduled over 70 staff members leading to increased profits 3-7% each quarter.
- Maintained inventory for business demands as well as promotional events maximizing liquor profits.
- Built strong rapport with industry representatives which opened stronger communication channels.

InfusionSoft | Chandler, AZ - *Independent Certified Consultant* 2014-2015

- Customer Support Representative helping new and experienced customers with InfusionSoft.
- Designed Customer Life Cycles with small business owners, meeting individual and specific needs.

Education

MakerSquare | Advanced Software Engineering Immersive Program | Austin, TX 2016

Arizona State University | BS Political Science | BA Literature | Tempe, AZ 2007

- Two-time American Legion Student of the Year
- Two-time Kiwanis Club Student of the Year

Personal

I'm a guitar-picking, Spanish-learning, record-collecting, world-traveling, outdoors enthusiast who loves the challenge of continued personal growth and craft beer.
